PROFESSIONAL SUMMARY

Software Developer with 4 years of experience building secure, cloud-native applications using Node.js and AWS serverless. Skilled in designing microservices and event-driven systems with a strong foundation in OOP, SOLID design principles, and TDD practices to ensure scalable and maintainable codebases.

SKILLS

Programming Languages: JavaScript, TypeScript, Java.

Cloud Technologies: AWS

Technologies & Tools: AWS CDK, Node.js, React, REST API, Asynchronous services, SQL, NoSQL, GitHub, Bitbucket, Unit Testing, Jest, Mocha & Chai, Postman, SoapUI, Confluence, JIRA.

EXPERIENCE

Software Developer, Tata Consultancy Services Canada Inc., Toronto, ON, Canada (Jan 2022 – Presently)

- ✎ Led the design and development of a cloud-hosted, high-traffic payment API platform (SaaS / API-as-a-Service), enabling customers to initiate and query wire transactions securely and reliably.
- ✎ Built APIs following OOP and SOLID design patterns, improving reusability and maintainability across modules.
- ✎ Optimized a high-traffic Payment Status API by redesigning DynamoDB queries with single-table design and GSIs, along with refactoring service logic, reducing response latency by nearly 60%.
- ✎ Designed an event-driven fan-out system to support parallel workflows, improving system throughput and responsiveness.
- ✎ Integrated Kafka topics as producer and consumer to support event-driven workflows, ensuring reliable pub/sub messaging and real-time data processing.
- ✎ Automated failure recovery with DLQs, enabling reprocessing of failed events and cutting incident resolution time in half.
- ✎ Delivered real-time monitoring dashboards for operations teams, reducing manual effort and improving visibility into system health.
- ✎ Engineered secure APIs with AWS KMS encryption and JWT authentication, ensuring compliance.
- ✎ Implemented Redis caching for Cognito JWT tokens, reducing authentication latency by 80% while securely managing credentials via IAM and Secrets Manager.
- ✎ Created and maintained API documentation using Swagger and OpenAPI specifications, ensuring clarity and standardization.
- ✎ Applied TDD (Jest) across services, reducing production defects by ensuring robust unit and integration coverage.
- ✎ Delivered real-time monitoring dashboards for operations teams, reducing manual effort and improving visibility into system health.
- ✎ Contributed to CI/CD pipelines with GitHub and Bitbucket, ensuring efficient, automated, and reliable deployments.

EDUCATION

Post Graduate Diploma, Web Design and Development

August 2021

Conestoga College Institute of Technology and Advanced Learning – Kitchener, ON, Canada.

Bachelor of Computer Applications, Computer Science

March 2018

Mahatma Gandhi University – Kottayam, Kerala, India.
